

论文ID	论文题目
76	Coverless Information Hiding Based on the Molecular Structure Images of Material
129	Investigation of the short-time photodissociation dynamics of Furfural in S2 state by Resonance Raman and quantum chemistry calculations
206	Roles of Anchor Trust and Platform Trust in Live-Streaming Consumers' Propensity: An Extended TAM Model
236	Time Optimization of Multiple Knowledge Transfers in the Big Data Environment
243	Verifiable Diversity Ranking Search Over Encrypted Outsourced Data
266	Phishing Detection With Image Retrieval Based on improved Texton Correlation Descriptor
267	A New Encryption-then-Compression Scheme on Gray Images Using the Markov Random Field
279	SecDisplay: A Super Light-weight Trust Display Anchor for ARM Platform
284	Fault diagnosis of motor in frequency domain signal by Stacked De-noising Auto-encoder
336	The Auxiliary Handoff Mechanism Based on Context and Particle Filter Algorithms
367	Research on signal reconstruction of phased array structure health monitoring based on the basis pursuit algorithm
370	Identifying influential spreaders by Temporal efficiency centrality in temporal network
378	Perceptual Image Hashing using Rotation Invariant Uniform Local Binary Patterns and Color Feature
387	A Forecasting Model Based on Information Granulated GA-SVR and ARIMA for Producer Price Index
397	A High Extraction Accuracy Robust JPEG Steganography with No Side Information
404	Provably Secure APK Redevelopment Authorization Scheme in the Standard Model
421	A case study of a two-stage image segmentation algorithm
424	Perfect Quantum Teleportation via Bell States
428	Snow cover mapping for mountainous areas by fusion of MODIS L1B and geographic data based on Stacked Denoising Auto-encoders
433	Improved lossless data hiding for JPEG images based on histogram modification
437	VariSecure: Facial Appearance Variance based Secure Device Pairing
443	Controlled cyclic remote state preparation of arbitrary qubit states
448	Waveband Selection with Equivalent Prediction Performance for FTIR/ATR Spectroscopic Analysis of COD in Sugar Refinery Waste Water
450	A Dual-spline Approach to Load Error Repair in a HEMS Sensor Network
451	abnormal network flow feature sequence prediction approach for DDoS attacks detection in bigdata environment
460	Learning Sparse Representation with Variational Auto-Encoder for Anomaly Detection
462	Research on Data Fusion of Adaptive Weighted Multisource Sensor
465	RTP timestamp steganography detection method
466	Research on Haze Governance Willingness Based on Structural Equation Modeling
471	Early stage of oxidation on titanium surface by reactive molecular dynamics simulation
476	Improved GNSS Cooperation Positioning Algorithm for Indoor Localization
482	Classification on Grade, Price, and Region with Multi-Label Methods in Wineinformatics
484	Paragraph Vector Representation Based on Word to Vector and CNN Learning
488	Side Channel Steganalysis: When Behavior is Considered in Steganographer Detection
497	A New NTRU-type Public-Key Cryptosystem over the Binary Field
504	A Distributed LRTC Algorithm in Large-scale DVE Multimedia Systems
512	Circular-Secure Analysis on Matrix GSW-FHE and Optimizing Bootstrapping
518	An Adaptive Audio Steganography Combining Interval and Variable Low Bit Coding
523	A Source Hiding Identity-Based Proxy Re-Encryption Scheme Without Random Oracles for Cloud Computing
532	Blockchain-based Trusted Electronic Records Preservation in Cloud Storage
545	Real-Time Visual Tracking with Compact Shape and Color Feature
566	An Evolutionary Computation based Feature Selection Method for Intrusion Detection
575	New Method for Computer Identification through Electromagnetic Radiation
583	Secure LBP Feature Extraction for smart compus images in Cloud Computing
589	The Research on the Permission Management of Android Application Based Machine Learning
590	Perceptual Gradient Similarity Deviation for Full Reference Image Quality Assessment
599	A Multi-Controller Load Balancing Strategy for Software Defined WiFi Networks
600	Market-oriented multi-agent sequential decision for cloud service composition
605	High Capacity Data Hiding in Encrypted Image Based on Compressive Sensing for Nonequivalent Resources
606	A Distributed Intrusion Detection Model via Nondestructive Partitioning and Balanced Allocation for Big Data
613	Server-aided Multi-Secret Sharing Scheme for Weak Computational Devices
623	Coverless Steganography for Digital Images Based on a Generative Model
624	Electronic structure and Physical Characteristics of Dioxin under External Electric Field
625	A novel hybrid anti-collision algorithm based on frame breaking policy for UHF RFID
626	Feature Relationships Learning Incorporated Age Estimation Assisted by Cumulative Attribute Encoding
627	Analysis and Improvement of Quantum Steganography Protocol Based on Bell States in Quantum Noise Environment
628	A Robust Image Watermarking Scheme in DCT Domain Based on Adaptive Texture Direction Quantization

632	A Spark Scheduling Strategy for Heterogeneous Cluster
634	Secure multimedia distribution in cloud computing using re-encryption and fingerprinting
641	Secure, Efficient and Searchable File System On Distributed Clouds
644	ITSD: Imbalanced Triangle Synthetic Data Method for Anomaly Detection
650	Fast Multi-Query Image Retrieval of Small Category Gallery using VGG16
652	A Novel Twist Deformation Model of Soft Tissue in Surgery Simulation
656	New Multi-keyword Ciphertext Search Method for Cloud Platform
657	Exploration for Software Mitigation to Spectre Attacks of Poisoning Indirect Branches
659	Dynamic-enabled Defense Strategy for the Home Internet Based on Game Models
661	Event-based Anomaly Detection for Non-public Industrial Communication Protocols in SDN-based Control Systems
662	a robust fingerprint identification method by deep learning with Gabor filter multidimensional feature expansion
665	An efficient image matching algorithm based on adaptive threshold and RANSAC
666	Digital Continuity Guarantee of Electronic Record based on Data Usability in Big Data Environment
668	Inverted XML Access Control Model based on Ontology Semantic Dependency
687	Symmetric learning data augmentation model for underwater target noise data expansion
701	A novel quantum image steganography algorithm based on exploiting modification direction
710	Cipher image retrieval based on AC-coefficients and color histograms
711	A Novel Steganography Scheme Based on Asymmetric Embedding Model
719	On the Privacy-preserving Outsourcing Scheme of Reversible Data Hiding over Encrypted Image data in Cloud
723	An Attack on Hollow CAPTCHA Using Accurate Filling and Nonredundant Merging
724	Reliable medical recommendation based on privacy-preserving collaborative filtering
726	Rare bird sparse recognition via part-based gist feature fusion and regularized intraclass dictionary learning
730	A Virtual Puncture Surgery System Based on Soft Tissue Simulated with Spherical Harmonic Function and Mass Spring Model
736	Semi-supervised Learning with Generative Adversarial Networks on Digital Signal Modulation Classification
744	Selective Opening Secure Certificateless Encryption Scheme
749	Feature Selection Method Based on Class Discriminative Degree for Intelligent Medical Diagnosis
750	Spatial-Temporal Variability of PM2.5 Concentration in Xuzhou, Eastern China using a method of Aerosol Classification
752	Machine Learning Based Resource Allocation of Cloud Computing in Auction
754	Dynamic Proofs of Retrievalability Based on Partitioning-Based Square Root Oblivious RAM
759	A modified three-term conjugate gradient algorithm for large-scale nonsmooth convex optimization
771	Controlled Secure Direct Communication Protocol via the Three-qubit Partially Entangled Set of States
772	A Cryptograph Domain Image Retrieval Method Based On Paillier Homomorphic Block Encryption
773	A Hybrid Resource Scheduling Strategy in Speculative Execution Based on Non-cooperative Game Theory
774	SMK-means: An Improved Mini Batch K-means Algorithm Based on Mapreduce with Big Data
777	Multi-VMs Intrusion Detection for Cloud Security using Dempster-Shafer Theory
785	A New Mutual Authentication Protocol in Mobile RFID
786	A Review of Convolutional Neural Network and Object Detection
792	Improving the System Log Analysis with Language Model and Semi-supervised Classifier
792	Improving the System Log Analysis with Language Model and Semi-supervised Classifier
801	A novel quantum steganography protocol based on Brown states
807	The Research of Mobile Location Privacy Protection Access Control Method Based on Game Theory
814	A novel multi-hop algorithm for wireless network with evenly distributed nodes
816	Appliance Recognition Based on Continuous Quadratic Programming
819	A Lightweight Three-Factor Anonymous Authentication Scheme with Privacy Protection for Personalized Healthcare Applications
822	Surface correction by quadratic quasi-uniform B-spline with multi-parameter
825	A memory-efficient simulation method of Grover's search algorithm
841	A Novel Universal Steganalysis Algorithm Based on the IQM and the SRM
853	Expression preserved face privacy protection based on Multi-Mode Discriminant Analysis
859	Towards Optimized DFA Attacks on AES under Multi-Byte Random Fault Model
864	A Method for Improving CNN-based Image Recognition Using DCGAN
866	Obfuscation-based Watermarking for Cloud Software Copyright Protection
873	A Reversible Data Hiding Algorithm Based on Ridge Regression Least Square Prediction
881	Sparse Image Classification based on Low-rank Representation Supervision
889	Traffic sign recognition based on multi-layer features and kernel ELM classifier
890	Natural Language Semantic Construction Based on Cloud Database
891	An improved memory cache management study based on Spark
894	Privacy-preserving content-aware search based on two-level index
896	A Coverless Information Hiding Algorithm Based On Grayscale Gradient Co-occurrence Matrix
897	Lever Arm Compensation of Autonomous Underwater Vehicle for Fast Transfer Alignment
898	Confusing-keyword based secure search over encrypted cloud data

899	An Optimized Labeling Scheme for Reachability Queries
904	Simulation Research on Safe Operation of UAV Non-isolated Airspace
923	Two-Dimensional Histogram Modification based Reversible Data Hiding using Motion Vector for H.264
936	Access Control Model Based on Time Synchronization Trust in Wireless Sensor Networks
942	A Robust Watermarking Scheme of Resistance to Affine Transformation Based on ASIFT Feature Points
951	Localization Algorithm of Indoor Wi-Fi Access Points Based on Signal Strength Relative Relationship and Region
952	Copy-move forgery detection using combined features and transitive matching
953	Sentiment Classification based on Piecewise Pooling Convolutional Neural Network
958	An Enhanced PEGASIS Algorithm with Mobile Sink Support for Wireless Sensor Networks
973	Research on the Law of Garlic Price Based on Big Data
974	Design of feedback shift register of against power analysis attack
987	Study on Time Series Restoration Method based on Image Coding and Neural Network
999	Research on the relationship between garlic and Young Garlic Shoot based on big data
1000	Research and Application of Traceability Model of Agricultural Products
1008	Research on The Combined Model of Garlic Short - term Price Forecasting Based on Big Data
1016	Network Attack Prediction Method based on Threat Intelligence
1024	GA-BP Air Quality Evaluation Method Based on Fuzzy Theory
1025	Street-Level Landmark Evaluation Based on Nearest Routers
1027	Research on Spatial Quantitative Analysis of Garlic Price Data Based on ArcGIS
1034	Defining Embedding Distortion for Intra Prediction Mode-based Video Steganography
1037	Development and Application of Big Data Platform for Garlic Industry Chain
1051	Optimal Secondary User Selection for Cooperative Spectrum Sensing in Cognitive Radio Sensor Networks
1053	A Self-embedding Image Fragile Watermarking Based on Combined Decision Using pre-offset and post-offset Blocks
1055	Provably Secure Verifier-based Password Authenticated Key Exchange from Lattices
1057	A Weighted Threshold Secret Sharing Scheme for Remote Sensing Image based on Chinese Remainder Theorem
1071	Privacy-preserving Sorting Algorithms based on Logistic Map for Clouds
1076	A Real-Time Correlation of Host-Level Events in Cyber Range Environment
1091	Dynamical interaction between information and disease spreading in populations of moving agents
1091	Dynamical interaction between information and disease spreading in populations of moving agents
1093	A Data Leakage Prevention Method Based on The Reduction of Confidential and Context Terms
1101	Automatic retinal layer segmentation in SD-OCT images with CSC guided by previous B-scan structure characteristics
1103	A Fuzzy Keyword Matching Proxy Broadcast Re-Encryption Scheme for Cloud Storage System
1115	Error Tolerant ASCA on FPGA
1125	Adversarial Learning for Distant Supervised Relation Extraction
1138	A Cooperative Spectrum Sensing Method Based on Empirical Mode Decomposition and K-medoids Algorithm
1139	A Privacy Preserving Scheme for Nearest Neighbor Query
1142	A Highly Effective DPA Attack Method based on Genetic Algorithm
1146	A Proxy Re-encryption with Keyword Search Scheme in Cloud Computing
1154	A lightweight multi-factor for the information perception of IoT
1155	Randomness Tests for ZigBee Protocol Based on Matrix Probability Test
1156	A Behavior-Based Intrusion Detection Model for IoT
1161	Application of Self-organizing Feature Map Neural Network Based on k-means Clustering in Network Intrusion Detection
1164	Binary Image Steganalysis Based on Distortion Level Co-occurrence Matrix
1171	Code Division Multiplexing Based Reversible Data Hiding Scheme for Medical Images
1175	A Truthful Combinatorial Auction for Privacy-Aware Service Subscription in People-centric Sensing
1183	Few-Shot Learning for Twitter Sentiment Analysis
1184	Semi-Supervised Few-Shot Learning for Twitter Sentiment Analysis
1186	A Novel Ensemble Learning Algorithm Based on D-S Evidence Theory for IoT Security
1188	Contourlet-DCT Based Multiple Robust Watermarkings For Medical Image
1195	A GLCM-feature-based approach for reversible image transformation
1222	Network Security Situation Awareness Framework based on Threat Intelligence
1225	SafeMP: Using Mechanical Wave Communication for Safer
1242	Mitigating Content Caching Attack in NDN
1244	WiFi Attacks and Privacy Disclosure via Photographs on Unmanned Aerial Vehicles
1245	A Collective Computing Architecture Supporting Heterogeneous Tasks and Computing Devices
1246	Multi-task Joint Sparse Representation Classification Based on Fisher Discrimination Dictionary Learning
1249	Improved VGG Model for Road Traffic Sign Recognition
1250	An Integrated Suture Simulation System for Multiple Surgery Scenes with Deformation Constraint Under A Suture Control Strategy
1253	ICRA: Index based Cache Replacement Algorithm for Cloud Storage
1267	NMF-based Authentication Scheme for Encrypted Speech
1268	Differential Cryptanalysis on Block Cipher Skinny with MILP Method
1274	An Evidence Combination Method Based on DBSCAN Clustering

1276	Molecular structure and electronic spectra of CoS under the radiation fields
1277	An improved Remote User Authentication over Wireless Communication Network
1286	A Heuristic Evolutionary Algorithm of UAV Path Planning
1288	Seed selection for data offloading based on social and interest graphs
1290	Domain Adaptive Collaborative Representation based Classification
1295	A Privacy-preserving image retrieval method based on improved BoVW model in cloud environment
1317	Research on Trust Model in Container-based Cloud Service
1330	Detection of bird' s nest in high power lines based on combination features and cascade classifier
1332	Crowdsourcing based Framework for Teaching Quality Evaluation and Feedback Using Linguistic 2-Tuple
1333	Estimating the Number of Posts in Sina Weibo
1340	A Dual-Chaining Watermark Scheme for Data Integrity Protection in the Perception Layer of IoT
1342	A Security Sandbox Technology of Android based on Hook Mechanism
1346	Intelligent control system of wheelchair based on brain wave and voice
1347	Designing adaptive JPEG steganography based on the statistical properties in spatial domain
1350	Semantic Search Encryption Based on Conceptual Graphs of Context
1360	A Privacy-Preserving Classifier in Statistic Pattern Recognition
1363	Smart Transportation Systems for Cities in the Framework of Future Networks
1368	A Method of Identifying Thunderstorm Clouds in Satellite Cloud Image Based on Clustering
1371	acSB: Anti-Collision Selective-based Broadcast Protocol in CR-AdHocs
1373	Analyzing Cross-domain Transportation Big Data of New York City with Semi-supervised and Active Learning
1374	A Novel Coverless Information Hiding Method Based on the Average Pixel Value of the Sub-images
1385	Study on Time Series Restoration Method based on Image Coding and Neural Network
1387	Secure Data Sharing Framework via Hierarchical Greedy Embedding in Darknets
1390	Access Control Policy Based on Friend Circle
1394	GFCache: a Greedy Failure Cache Considering Failure Recency and Failure Frequency for an Erasure-coded Storage System
1396	A fusion steganographic algorithm based on object regions
1397	Some Topological indices computing results of Archimedean lattices L (4 ; 6 ; 12)
1403	Efficient Fully Homomorphic Encryption with Larger Plaintext Space
1407	Identifying materials of photographic images and photorealistic computer generated graphics based on deep
1408	Efficient Interference Estimation with Accuracy Control for Data-Driven Resource Allocation in Cloud-RAN
1418	Secure video streaming with lightweight cipher PRESENT in a SDN Testbed
1422	Differentially Private Real-time Streaming Data Publication Based on Sliding Window under Exponential Decay
1447	Reversible Data Hiding in Classification-Scrambling Encrypted Image Based on Iterative Recovery
1448	VPRO: An Improved Zero-copy Framework for Intelligent Surveillance Networks
1452	A New Image Feature Ensemble Method based on LSTM
1453	ID1453: Replay Attack Detection Based on Distortion by Loudspeaker for voice authentication
1459	Image classification with a MSF dropout
1467	Wearable IoT Enabled Real Time Health and Behaviour Monnitoring System
1468	An Advanced Quantum-Resistent Signature Scheme for Cloud Based on Eisenstein Ring
1472	A word-embedding-based steganalysis method for linguistic steganography via synonym-substitution
1482	W-Bayes indoor location algorithm based on dynamic region selection
1486	An Exception Handling Approach for Privacy-preserving Service Recommendation Failure in A Cloud Environment
1487	Developing a New Security Framework for Bluetooth Low Energy Devices
1498	Time-based Access Control for Multi-attribute Data in Internet of Things
1501	Data-driven Logical Topology Inference and Person Re-identification based on Multi-cameras IoT
1506	A MPTCP Scheduler for web Transfer
1516	Watermark Embedding for Direct Binary Searched Halftone Images by Adopting Visual Cryptography
1517	Speech resampling detection based on the inconsistency of band energy
1521	An Adaptive Construction Test Method Based on Geometric Calculation for Linearly Separable Problems
1524	An Improved Deep Learning to Hash For Indexing Big Data
1529	Secure and Privacy-Preserving 3D Vehicle Positioning Schemes for Vehicular Ad Hoc Network
1530	3D steganalysis using Laplacian smoothing at various levels
1533	A Co-Verification Interface Design for High-Assurance CPS
1535	Hybrid Network Coding Scheme in Cognitive Radio Networks with Multiple Secondary Users
1538	A fair blind signature scheme to revoke malicious vehicles in VANETS
1540	Iris Liveness Detection Based on Batch Normalized Convolutional Neural Network
1541	Modeling and Data analysis of the Balise System
1547	User Profile-Aware Attention-based Bidirectional Long Short-Term Memory Neural Network for Political Content Detection
1549	An Algorithm of Mining Key Accounts in Topic Propagation Based on Dual Random Walk
1550	Virtual Network Embedding in Wireless Multi-hop Cellular Networks
1553	TR-IDS: Anomaly-based Intrusion Detection through Text-convolutional Neural Network and Random Forest
1557	A Model Based on Convolutional Neural Network for Online Transaction Fraud Detection

1570	Analysis and improvement of an efficient controlled quantum secure direct communication and authentication protocol
1572	Research on Energy Balance Data Fusion Algorithm based on Compressed Sensing in Wireless Sensor Networks
1575	Algorithm to Most Reliable Maximum Flow on CDN
1576	The Location Privacy Preserving of Social Network based on RCCAM Access Control
1577	A Median Filtering Forensics Scheme for Color Images Based on Magnitude-Phase CNN
1579	The Application of BP Neural Networks to Analysis of National Vulnerability
1591	Band Selection Method of Absorption Peak Perturbance for the FTIR/ATR Spectrum Analysis
1592	Design of event-triggered fault-tolerant control for stochastic systems with time-delay
1600	A Deep Forest-based Approach for Online Transaction Fraud Detection
1603	Comparison Study on the Statistics Based Trust Schemes for Wireless Sensor Networks
1604	A Multivariable Optical Remote Sensing Image Feature Discretization Method Applied to Marine Vessel Targets Recognition
1605	An Efficient Integrity Auditing Scheme without Bilinear Pairing
1610	A Estimation Mechanism of the Level of the Service based on Fuzzy Logic in both the Cloud Computing and the Internet of Things
1625	Robust USBL for DOA estimation in MIMO radar with mutual coupling and nonuniform noise
1633	AB-TDMA: An Energy-Efficient MAC for Concurrent Data Collection and Data Dissemination
1636	FDQC: Full-blind delegating private quantum computation
1644	A novel time-aware frame adjustment strategy for RFID anti-collision
1646	In situ synthesis of cuprous oxide/cellulose nanofibers gel and antibacterial properties
1647	Multidimensional Fuzzy Fingerprint based Geofence Security and Protection
1648	Automatic Mining of Security-sensitive Functions from Source Code
1649	Privacy-preserving quantum two-party geometric intersection
1651	Segmentation and Recognition of Continuous Human Activity using WiFi
1652	A Multi-grained Log Auditing Scheme for Cloud Data Confidentiality
1653	Cloud-based Image Fusion for Mobile Network
1657	A Lightweight Fingerprint-based Method for Inexpensive and Scalable Indoor Subarea Localization
1658	A Blockchain-Based Authentication Protocol for WLAN Mesh Security Access Scheme
1660	Time-Aware CF and Association Rule Mining based Personalized Hybrid Recommender
1661	Modification of Nano Tourmaline Surface Treatment Agent and Its Performance on Negative Ion Release
1667	DDoS attack detection method based on flow correlation and random forest
1670	Steganography using reversible texture synthesis based on seeded region growing and LSB
1671	Multi-Target Regression via Multi-target Stacking and Random Linear Target Combinations
1684	Reversible Natural Language Watermarking Using Synonym Substitution and Arithmetic Coding
1686	Adaptive DDoS attack detection method based on multiple kernel learning
1688	fast near-duplicate image detection in Riemannian space by a novel hashing scheme
1690	Efficient Secure Data Provenance Scheme in Multimedia Outsourcing and Sharing
1694	Fractional quaternion cosine transform and its application in color image copy-move forgery detection
1743	Motion and Disparity Vectors Early Determination for Texture Video in 3D-HEVC
